

CD105 Rabbit pAb

db9679

Package : 20μL 50μL 100μL

Product Name : CD105 Rabbit pAb**Cat.No.:** db9679**Synonyms** : END; HHT1; ORW1**Application** : WB, IHC**Reactivity** : Human**Host species** : Rabbit**Background**

This gene encodes a homodimeric transmembrane protein which is a major glycoprotein of the vascular endothelium. This protein is a component of the transforming growth factor beta receptor complex and it binds to the beta1 and beta3 peptides with high affinity. Mutations in this gene cause hereditary hemorrhagic telangiectasia, also known as Osler-Rendu-Weber syndrome 1, an autosomal dominant multisystemic vascular dysplasia. This gene may also be involved in preeclampsia and several types of cancer. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.
