

Phospho-Vimentin (Ser72) Rabbit pAb

db3657 Package: 20μL 50μL 100μL

Product Name: Phospho-Vimentin (Ser72) Rabbit pAb

Cat.No.: db3657

Synonyms: VIM

Application: WB, IP

Reactivity: Human, Mouse, Rat

Host species: Rabbit

Background This gene encodes a type III intermediate filament protein. Intermediate filaments, along with

microtubules and actin microfilaments, make up the cytoskeleton. The encoded protein is responsible for maintaining cell shape and integrity of the cytoplasm, and stabilizing cytoskeletal interactions. This protein is involved in neuritogenesis and cholesterol transport and functions as an

organizer of a number of other critical proteins involved in cell attachment, migration, and signaling.

Bacterial and viral pathogens have been shown to attach to this protein on the host cell surface.

Mutations in this gene are associated with congenital cataracts in human patients. [provided by
