

Phospho-Progesterone Receptor (Ser190) Rabbit pAb

db9328

Package : 20µL 50µL 100µL

Product Name : Phospho-Progesterone Receptor (Ser190) Rabbit pAb**Cat.No.:** db9328**Synonyms** : PR; NR3C3**Application** : WB, IHC, ICC/IF, IP**Reactivity** : Human**Host species** : Rabbit**Background**

This gene encodes a member of the steroid receptor superfamily. The encoded protein mediates the physiological effects of progesterone, which plays a central role in reproductive events associated with the establishment and maintenance of pregnancy. This gene uses two distinct promoters and translation start sites in the first exon to produce several transcript variants, both protein coding and non-protein coding. Two of the isoforms (A and B) are identical except for an additional 165 amino acids found in the N-terminus of isoform B and mediate their own response genes and physiologic effects with little overlap. [provided by RefSeq, Sep 2015]

Immunogen

A synthetic phosphopeptide corresponding to residues surrounding Ser190 of human Progesterone Receptor

Gene ID

5241

Swiss Prot

P06401

Synonyms

PR; NR3C3

Reactivity

Human

Application

WB, IHC, ICC/IF, IP

Recommended dilution

WB: 1:2000

IHC: 1:50

ICC/IF: 1:50

IP: 1:20

Calculated MW

99 kDa

Observed MW

90,118 kDa

Host species

Rabbit

Clonality

Polyclonal

Isotype

IgG

Purity	Affinity Purification
Conjugation	Un-conjugated
Storage Stability	Store at -20°C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium azide and 0.05% BSA. Stable for 12 months from date of receipt.
