Package : 100μL

Product Name : CD7 (BP6105) Rabbit mAb**Cat.No.:** db30088**Synonyms :** GP40; TP41; Tp40; LEU-9**Application :** IHC**Reactivity :** Human**Host species :** Rabbit**Background**

The CD7 molecule is a membrane-bound glycoprotein and is the earliest T cell specific antigen to be expressed in lymphocytes. CD7 antigen is also the only early marker to persist throughout differentiation. The function and role of the CD7 molecule has not yet been fully identified, although the activation of T cells with gamma/delta receptors has been proposed based on mAb-induced activation.
