Synonyms: Bcl-2; PPP1R50 **Application**: WB, IHC-P, IP

Reactivity : Human

Host species : Rabbit

Background This gene encodes an integral outer mitochondrial membrane protein that blocks the apoptotic

death of some cells such as lymphocytes. Constitutive expression of BCL2, such as in the case of translocation of BCL2 to lg heavy chain locus, is thought to be the cause of follicular lymphoma.

Alternative splicing results in multiple transcript variants. [provided by RefSeq, Feb 2016]
