Product Name : IL-7R alpha (DGR14254) Rabbit mAb**Cat.No.:** db13929**Synonyms :** ILRA; CD127; IL7RA; CDW127; IL-7R-alpha**Application :** WB, ICC/IF**Reactivity :** Human**Host species :** Rabbit**Background**

The protein encoded by this gene is a receptor for interleukin 7 (IL7). The function of this receptor requires the interleukin 2 receptor, gamma chain (IL2RG), which is a common gamma chain shared by the receptors of various cytokines, including interleukins 2, 4, 7, 9, and 15. This protein has been shown to play a critical role in V(D)J recombination during lymphocyte development. Defects in this gene may be associated with severe combined immunodeficiency (SCID). Alternatively spliced transcript variants have been found. [provided by RefSeq, Dec 2015]
