Product Name : SLBP (DGR16664) Rabbit mAb**Cat.No.:** db11213**Synonyms :** HBP**Application :** WB, FC, IP**Reactivity :** Human**Host species :** Rabbit**Background**

This gene encodes a protein that binds to the stem-loop structure in replication-dependent histone mRNAs. Histone mRNAs do not contain introns or polyadenylation signals, and are processed by endonucleolytic cleavage. The stem-loop structure is essential for efficient processing but this structure also controls the transport, translation and stability of histone mRNAs. Expression of the protein is regulated during the cell cycle, increasing more than 10-fold during the latter part of G1. [provided by RefSeq, Jul 2008]
