Product Name : Phospho-IGF-I receptor beta (Tyr1166)/Insulin receptor beta (Tyr1190)/Insulin receptor-related protein beta (Tyr1146) (DGR14098) Rabbit mAb**Cat.No.:** db11281**Synonyms :** IGFR; CD221; IGFR; JTK13**Application :** WB, IP**Reactivity :** Human,Mouse,Rat**Host species :** Rabbit**Background**

This receptor binds insulin-like growth factor with a high affinity. It has tyrosine kinase activity. The insulin-like growth factor I receptor plays a critical role in transformation events. Cleavage of the precursor generates alpha and beta subunits. It is highly overexpressed in most malignant tissues where it functions as an anti-apoptotic agent by enhancing cell survival. Alternatively spliced transcript variants encoding distinct isoforms have been found for this gene. [provided by RefSeq, May 2014]
