Recombinant DGRmAb®

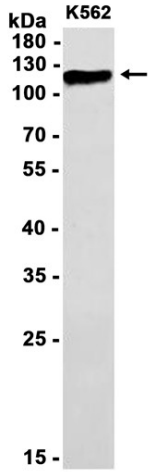

Phospho-ATP citrate lyase (Thr447/Ser451) (DGR19620) Rabbit mAb

db14234 **Package : 10μL 20μL 50μL 100μL**

Product Name : Phospho-ATP citrate lyase (Thr447/Ser451) (DGR19620) Rabbit mAb
Cat.No.: db14234
Synonyms : ACL; ATPCL; CLATP
Application : WB
Reactivity : Human,Mouse,Rat
Host species : Rabbit

Background	ATP citrate lyase is the primary enzyme responsible for the synthesis of cytosolic acetyl-CoA in many tissues. The enzyme is a tetramer (relative molecular weight approximately 440,000) of apparently identical subunits. It catalyzes the formation of acetyl-CoA and oxaloacetate from citrate and CoA with a concomitant hydrolysis of ATP to ADP and phosphate. The product, acetyl-CoA, serves several important biosynthetic pathways, including lipogenesis and cholesterogenesis. In nervous tissue, ATP citrate-lyase may be involved in the biosynthesis of acetylcholine. Multiple transcript variants encoding distinct isoforms have been identified for this gene. [provided by RefSeq, Dec 2014]
Immunogen	A synthetic phosphopeptide corresponding to residues surrounding Thr447/Ser451 of human ATP citrate lyase
Gene ID	47
Swiss Prot	P53396
Synonyms	ACL; ATPCL; CLATP
Reactivity	Human,Mouse,Rat
Application	WB
Recommended dilution	WB: 1:1000
Calculated MW	121 kDa
Observed MW	121 kDa
Host species	Rabbit
Clonality	Monoclonal
Clonality No.	DGR19620

Isotype	IgG
Purity	Affinity Purification
Conjugation	Un-conjugated
Storage Stability	Store at -20°C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium azide and 0.05% BSA. Stable for 12 months from date of receipt.

Western blot analysis of extracts from K562 cells using db14234 at 1:1000.
