Product Name : PI3-Kinase p85 alpha (DGR31639) Rabbit mAb**Cat.No.:** db12183**Synonyms** : p85; AGM7; GRB1; IMD36; p85-ALPHA**Application** : WB**Reactivity** : Human,Mouse,Rat**Host species** : Rabbit**Background**

Phosphatidylinositol 3-kinase phosphorylates the inositol ring of phosphatidylinositol at the 3-prime position. The enzyme comprises a 110 kD catalytic subunit and a regulatory subunit of either 85, 55, or 50 kD. This gene encodes the 85 kD regulatory subunit. Phosphatidylinositol 3-kinase plays an important role in the metabolic actions of insulin, and a mutation in this gene has been associated with insulin resistance. Alternative splicing of this gene results in four transcript variants encoding different isoforms. [provided by RefSeq, Jun 2011]
