

Recombinant

DGRmAb®

ADK (DGR33090) Rabbit mAb

db12867

Package : 10µL 20µL 50µL 100µL

Product Name : ADK (DGR33090) Rabbit mAb**Cat.No.:** db12867**Synonyms** : AK**Application** : WB, IHC-P, FC**Reactivity** : Human,Mouse,Rat**Host species** : Rabbit**Background**

This gene an enzyme which catalyzes the transfer of the gamma-phosphate from ATP to adenosine, thereby serving as a regulator of concentrations of both extracellular adenosine and intracellular adenine nucleotides. Adenosine has widespread effects on the cardiovascular, nervous, respiratory, and immune systems and inhibitors of the enzyme could play an important pharmacological role in increasing intravascular adenosine concentrations and acting as anti-inflammatory agents. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jan 2011]

Immunogen

Recombinant protein of human ADK

Gene ID

132

Swiss Prot

P55263

Synonyms

AK

Reactivity

Human,Mouse,Rat

Application

WB, IHC-P, FC

Recommended dilution

WB: 1:1000

IHC-P: 1:200-1:1000

FC: 1:200-1:500

Calculated MW

41 kDa

Observed MW

41 kDa

Host species

Rabbit

Clonality

Monoclonal

Clonality No.

DGR33090

Isotype	IgG
Purity	Affinity Purification
Conjugation	Un-conjugated
Storage Stability	Store at -20°C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium azide and 0.05% BSA. Stable for 12 months from date of receipt.

Western blot detection of ADK in Hela,A549,HL-60,U251,U87-MG cell lysates using ADK antibody(1:1000 diluted).

Immunohistochemical analysis of paraffin-embedded human tonsil using db12867 antibody.
