Product Name : DNPH1 Rabbit pAb**Cat.No.:** db24112**Synonyms** : RCL; C6orf108; dJ330M21.3**Application** : WB, IHC**Reactivity** : Human**Host species** : Rabbit**Background**

This gene was identified on the basis of its stimulation by c-Myc protein. The latter is a transcription factor that participates in the regulation of cell proliferation, differentiation, and apoptosis. The exact function of this gene is not known but studies in rat suggest a role in cellular proliferation and c-Myc-mediated transformation. Two alternative transcripts encoding different proteins have been described. [provided by RefSeq, Jul 2008]
