

## TNF alpha Rabbit pAb

db8127

Package : 20µL 50µL 100µL

Product Name : TNF alpha Rabbit pAb Cat.No.: db8127 Synonyms : DIF; Tnfa; TNF-a; TNFSF2; Tnlg1f; Tnfsf1a; TNFalpha; TNF-alpha Application : WB, ICC/IF, FC, IP Reactivity : Mouse, Rat Host species : Rabbit

| Background           | This gene encodes a multifunctional proinflammatory cytokine that belongs to the tumor necrosis           |
|----------------------|-----------------------------------------------------------------------------------------------------------|
|                      | factor (TNF) superfamily. Members of this family are classified based on primary sequence,                |
|                      | function, and structure. This protein is synthesized as a type-II transmembrane protein and is            |
|                      | reported to be cleaved into products that exert distinct biological functions. It plays an important role |
|                      | in the innate immune response as well as regulating homeostasis but is also implicated in                 |
|                      | diseases of chronic inflammation. In mouse deficiency of this gene is associated with defects in          |
|                      | response to bacterial infection, with defects in forming organized follicular dendritic cell networks     |
|                      | and germinal centers, and with a lack of primary B cell follicles. Alternative splicing results in        |
|                      | multiple transcript variants. [provided by RefSeq, Jun 2013]                                              |
| Immunogen            | Recombinant protein of mouse TNF alpha                                                                    |
| Gene ID              | 21926, 24835                                                                                              |
| Swiss Prot           | P06804, P16599                                                                                            |
| Synonyms             | DIF; Tnfa; TNF-a; TNFSF2; Tnlg1f; Tnfsf1a; TNFalpha; TNF-alpha                                            |
| Reactivity           | Mouse, Rat                                                                                                |
| Application          | WB, ICC/IF, FC, IP                                                                                        |
| Recommended dilution | WB: 1:1000                                                                                                |
|                      | ICC/IF: 1:100                                                                                             |
|                      | FC: 1:100                                                                                                 |
|                      | IP: 1:20                                                                                                  |
| Calculated MW        | 26 kDa                                                                                                    |
| Observed MW          | 26 kDa                                                                                                    |
| Host species         | Rabbit                                                                                                    |
| Clonality            | Polyclonal                                                                                                |

| lsotype           | lgG                                                                                                                                                           |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Purity            | Affinity Purification                                                                                                                                         |
| Conjugation       | Un-conjugated                                                                                                                                                 |
| Storage Stability | Store at -20°C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium azide and 0.05% BSA. Stable for 12 months from date of receipt. |
