

TRAF3 Rabbit pAb

db21376

Package : 20µL 50µL 100µL

Product Name : TRAF3 Rabbit pAb**Cat.No.:** db21376**Synonyms** : CAP1; LAP1; CAP-1; CRAF1; IIAE5; CD40bp; RNF118**Application** : WB**Reactivity** : Human, Mouse, Rat**Host species** : Rabbit**Background**

The protein encoded by this gene is a member of the TNF receptor associated factor (TRAF) protein family. TRAF proteins associate with, and mediate the signal transduction from, members of the TNF receptor (TNFR) superfamily. This protein participates in the signal transduction of CD40, a TNFR family member important for the activation of the immune response. This protein is found to be a critical component of the lymphotoxin-beta receptor (LTbetaR) signaling complex, which induces NF-kappaB activation and cell death initiated by LTbeta ligation. Epstein-Barr virus encoded latent infection membrane protein-1 (LMP1) can interact with this and several other members of the TRAF family, which may be essential for the oncogenic effects of LMP1. The protein also plays a role in the regulation of antiviral response. Mutations in this are associated with Encephalopathy, acute, infection-induced, herpes-specific 5. [provided by RefSeq, Jul 2020]

Immunogen

A synthetic peptide of human TRAF3

Gene ID

7187

Swiss Prot

Q13114

Synonyms

CAP1; LAP1; CAP-1; CRAF1; IIAE5; CD40bp; RNF118

Reactivity

Human, Mouse, Rat

Application

WB

Recommended dilution

WB: 1:1000

Calculated MW

64 kDa

Observed MW

64 kDa

Host species

Rabbit

Clonality

Polyclonal

Isotype

IgG
