

Recombinant Human IL-5 Protein (Standard)

PKT-245P

Package : 可询价

Product Name : Recombinant Human IL-5 Protein (Standard)

Cat.No.: PKT-245P

Synonyms : Interleukin-5, IL-5, EDF, TRF

Application : ELISA

Expression host : Baculovirus-Insect Cells

Species : Human

|                   |                                                                                                                                                                             |

| Synonyms          | Interleukin-5, IL-5, EDF, TRF                                                                                                                                               |
| Application       | ELISA                                                                                                                                                                       |
| Molecular Weight  | 14.2kDa (124aa), 13.5-18kDa (SDS-PAGE under reducing conditions)                                                                                                            |
| Species           | Human                                                                                                                                                                       |
| Purity            | >85% as determined by SDS-PAGE.                                                                                                                                             |
| Seq               | 20-134aa                                                                                                                                                                    |
| Concentration     | 0.5mg/ml (determined by Absorbance at 280nm)                                                                                                                                |
| Formulation       | Freeze-dried powder                                                                                                                                                         |
| Detection Method  | Sandwich ELISA                                                                                                                                                              |
| Storage Stability | Aliquot and store at -20℃ to -80℃ for up to 6 months. Phosphate buffered saline (pH7.4) containing 0.01% sarcosyl, 5%Trehalose; buffer containing 50% Glycerol is recommen. |
