Product Name : AATF (DGR20842) Rabbit mAb**Cat.No.:** db11150**Synonyms :** DED; BFR2; CHE1; CHE-1**Application :** WB, ICC/IF, IP**Reactivity :** Human, Mouse**Host species :** Rabbit**Background**

The protein encoded by this gene was identified on the basis of its interaction with MAP3K12/DLK, a protein kinase known to be involved in the induction of cell apoptosis. This gene product contains a leucine zipper, which is a characteristic motif of transcription factors, and was shown to exhibit strong transactivation activity when fused to Gal4 DNA binding domain. Overexpression of this gene interfered with MAP3K12 induced apoptosis. [provided by RefSeq, Jul 2008]
