

## p53 (DGR20481) Rabbit mAb

db11663 Package : 10μL 20μL 50μL 100μL

Product Name: p53 (DGR20481) Rabbit mAb

Cat.No.: db11663

Synonyms: bbl; bfy; bhy; p44; p53; Tp53

Application: WB, ICC/IF, FC, IP

Reactivity: Human, Mouse Host species: Rabbit

**Background** This gene encodes tumor protein p53, which responds to diverse cellular stresses to regulate

target genes that induce cell cycle arrest, apoptosis, senescence, DNA repair, or changes in metabolism. p53 protein is expressed at low level in normal cells and at a high level in a variety of transformed cell lines, where it's believed to contribute to transformation and malignancy. p53 is a DNA-binding protein containing transcription activation, DNA-binding, and oligomerization domains. It is postulated to bind to a p53-binding site and activate expression of downstream genes that inhibit growth and/or invasion, and thus function as a tumor suppressor. Mice deficient for this gene are developmentally normal but are susceptible to spontaneous tumors. Evidence to date shows that this gene contains one promoter, in contrast to alternative promoters of the human

gene, and transcribes a few of splice variants which encode different isoforms, although the biological validity or the full-length nature of some variants has not been determined. [provided by

RefSeq, Jul 2008]

**Immunogen** Recombinant protein of mouse p53

**Gene ID** 22059

Swiss Prot P02340

**Synonyms** bbl; bfy; bhy; p44; p53; Tp53

Reactivity Human, Mouse

**Application** WB, ICC/IF, FC, IP

**Recommended dilution** WB: 1:1000

ICC/IF: 1:100 FC: 1:50-1:100

IP: 1:20-1:50

Calculated MW 44 kDa

## For Research Use Only **Product Datasheet**

Observed MW 53 kDa

Host species Rabbit

**Clonality** Monoclonal

Clonality No. DGR20481

**Isotype** IgG

**Purity** Affinity Purification

**Conjugation** Un-conjugated

Storage Stability Store at -20°C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium

azide and 0.05% BSA. Stable for 12 months from date of receipt.
