Product Name : 58K Golgi Protein (DGR35932) Rabbit mAb Cat.No.: db12440 Synonyms : LCHC1 Application : WB, IHC-P Reactivity : Human

Host species : Rabbit

Background	The protein encoded by this gene is a bifunctional enzyme that channels 1-carbon units from formiminoglutamate, a metabolite of the histidine degradation pathway, to the folate pool. Mutations in this gene are associated with glutamate formiminotransferase deficiency. Alternatively spliced transcript variants have been found for this gene.[provided by RefSeq, Dec 2009]
