Product Name : GRB7 (DGR34078) Rabbit mAb**Cat.No.:** db12974**Synonyms** : Growth factor receptor-bound protein 7**Application** : WB**Reactivity** : Human**Host species** : Rabbit**Background**

The product of this gene belongs to a small family of adapter proteins that are known to interact with a number of receptor tyrosine kinases and signaling molecules. This gene encodes a growth factor receptor-binding protein that interacts with epidermal growth factor receptor (EGFR) and ephrin receptors. The protein plays a role in the integrin signaling pathway and cell migration by binding with focal adhesion kinase (FAK). Several transcript variants encoding two different isoforms have been found for this gene. [provided by RefSeq, Jun 2011]
