Product Name : Cortisol Binding Globulin (DGR32924) Rabbit mAb**Cat.No.:** db13339**Synonyms :** CBG**Application :** WB**Reactivity :** Human**Host species :** Rabbit**Background**

This gene encodes an alpha-globulin protein with corticosteroid-binding properties. This is the major transport protein for glucocorticoids and progestins in the blood of most vertebrates. The gene localizes to a chromosomal region containing several closely related serine protease inhibitors which may have evolved by duplication events. [provided by RefSeq, Jul 2008]
