Product Name : DAPK2 (DGR32917) Rabbit mAb**Cat.No.:** db13346**Synonyms** : DRP1; DRP-1**Application** : WB**Reactivity** : Human**Host species** : Rabbit**Background**

This gene encodes a protein that belongs to the serine/threonine protein kinase family. This protein contains a N-terminal protein kinase domain followed by a conserved calmodulin-binding domain with significant similarity to that of death-associated protein kinase 1 (DAPK1), a positive regulator of programmed cell death. Overexpression of this gene was shown to induce cell apoptosis. It uses multiple polyadenylation sites. [provided by RefSeq, Jul 2008]
