## Phospho-PKC zeta (Thr560) (DGR15836) Rabbit mAb

db13941 Package : 10μL 20μL 50μL 100μL

Product Name: Phospho-PKC zeta (Thr560) (DGR15836) Rabbit mAb

Cat.No.: db13941

Synonyms: PKC2; PKC-ZETA

Application: WB, IHC-P

Reactivity: Human, Mouse, Rat

Host species: Rabbit

**Background** Protein kinase C (PKC) zeta is a member of the PKC family of serine/threonine kinases which are

involved in a variety of cellular processes such as proliferation, differentiation and secretion. Unlike the classical PKC isoenzymes which are calcium-dependent, PKC zeta exhibits a kinase activity which is independent of calcium and diacylglycerol but not of phosphatidylserine. Furthermore, it is insensitive to typical PKC inhibitors and cannot be activated by phorbol ester. Unlike the classical PKC isoenzymes, it has only a single zinc finger module. These structural and biochemical properties indicate that the zeta subspecies is related to, but distinct from other isoenzymes of

PKC. Alternative splicing results in multiple transcript variants encoding different isoforms.

[provided by RefSeq, Jul 2008]

**Immunogen** A synthetic phosphopeptide corresponding to residues surrounding Thr560 of human PKC zeta

Gene ID 5590

Swiss Prot Q05513

**Synonyms** PKC2; PKC-ZETA

Reactivity Human.Mouse.Rat

**Application** WB, IHC-P

Recommended dilution WB: 1:1000-1:5000

IHC-P: 1:100

Calculated MW 68 kDa

**Observed MW** 68 kDa

Host species Rabbit

**Clonality** Monoclonal

Clonality No. DGR15836

## For Research Use Only **Product Datasheet**

**Isotype** IgG

**Purity** Affinity Purification

Conjugation Un-conjugated

Storage Stability Store at -20°C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium

azide and 0.05% BSA. Stable for 12 months from date of receipt.

HeLa Western blot analysis of extracts from HeLa cells using db13941 at 1:1000.
