DGRmAb[®]

Phospho-MLKL (Ser358) (DGR13914) Rabbit mAb

db13999 Package : 10μL 20μL 50μL 100μL

Product Name: Phospho-MLKL (Ser358) (DGR13914) Rabbit mAb

Cat.No.: db13999
Synonyms: hMLKL
Application: WB, IHC-P
Reactivity: Human
Host species: Rabbit

Background This gene belongs to the protein kinase superfamily. The encoded protein contains a protein

kinase-like domain; however, is thought to be inactive because it lacks several residues required for activity. This protein plays a critical role in tumor necrosis factor (TNF)-induced necroptosis, a programmed cell death process, via interaction with receptor-interacting protein 3 (RIP3), which is a key signaling molecule in necroptosis pathway. Inhibitor studies and knockdown of this gene inhibited TNF-induced necrosis. High levels of this protein and RIP3 are associated with inflammatory bowel disease in children. Alternatively spliced transcript variants have been

described for this gene. [provided by RefSeq, Sep 2015]

Immunogen A synthetic phosphopeptide corresponding to residues surrounding Ser358 of human MLKL

Gene ID 197259

Swiss Prot O8NB16

Synonyms hMLKL

Reactivity Human

Application WB, IHC-P

Recommended dilution WB: 1:1000

IHC-P: 1:200-1:500

Calculated MW 55 kDa

Observed MW 55 kDa

Host species Rabbit

Clonality Monoclonal

Clonality No. DGR13914

For Research Use Only **Product Datasheet**

Isotype IgG

Purity Affinity Purification

Conjugation Un-conjugated

Storage Stability Store at -20°C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium

azide and 0.05% BSA. Stable for 12 months from date of receipt.
