Product Name : IRAKM (DGR15079) Rabbit mAb**Cat.No.:** db15149**Synonyms** : ASRT5; IRAKM**Application** : WB**Reactivity** : Human**Host species** : Rabbit**Background**

This gene encodes a member of the interleukin-1 receptor-associated kinase protein family. Members of this family are essential components of the Toll/IL-R immune signal transduction pathways. This protein is primarily expressed in monocytes and macrophages and functions as a negative regulator of Toll-like receptor signaling. Mutations in this gene are associated with a susceptibility to asthma. Alternate splicing results in multiple transcript variants. [provided by RefSeq, May 2010]
