Product Name : Bid Cleavage Site (DGR13684) Rabbit mAb**Cat.No.:** db15514**Synonyms** : FP497**Application** : WB**Reactivity** : Human**Host species** : Rabbit**Background**

This gene encodes a death agonist that heterodimerizes with either agonist BAX or antagonist BCL2. The encoded protein is a member of the BCL-2 family of cell death regulators. It is a mediator of mitochondrial damage induced by caspase-8 (CASP8); CASP8 cleaves this encoded protein, and the COOH-terminal part translocates to mitochondria where it triggers cytochrome c release. Multiple alternatively spliced transcript variants have been found, but the full-length nature of some variants has not been defined. [provided by RefSeq, Jul 2008]

Immunogen

A synthetic peptide of human Bid Cleavage Site

Gene ID

637

Swiss Prot
