Product Name : SCRIBBLE (DGR13594) Rabbit mAb**Cat.No.:** db15534**Synonyms :** CRIB1; SCRB1; SCRIB1; Vartul**Application :** WB, FC**Reactivity :** Human**Host species :** Rabbit**Background**

This gene encodes a protein that was identified as being similar to the Drosophila scribble protein. The mammalian protein is involved in tumor suppression pathways. As a scaffold protein involved in cell polarization processes, this protein binds to many other proteins. The encoded protein binds to papillomavirus E6 protein via its PDZ domain and the C-terminus of E6. Two alternatively spliced transcript variants that encode different protein isoforms have been found for this gene. [provided by RefSeq, Nov 2011]
