

## PKC beta 1 (DGR11157) Rabbit mAb

db16067 Package : 10μL 20μL 50μL 100μL

Product Name: PKC beta 1 (DGR11157) Rabbit mAb

Cat.No.: db16067

Synonyms: PKCB; PRKCB1; PRKCB2; PKC-beta

**Application**: WB, IHC-P, ICC/IF, FC **Reactivity**: Human, Mouse, Rat

Host species: Rabbit

**Background** Protein kinase C (PKC) is a family of serine- and threonine-specific protein kinases that can be

activated by calcium and second messenger diacylglycerol. PKC family members phosphorylate a wide variety of protein targets and are known to be involved in diverse cellular signaling pathways.

PKC family members also serve as major receptors for phorbol esters, a class of tumor promoters.

Each member of the PKC family has a specific expression profile and is believed to play a distinct role in cells. The protein encoded by this gene is one of the PKC family members. This protein

kinase has been reported to be involved in many different cellular functions, such as B cell

activation, apoptosis induction, endothelial cell proliferation, and intestinal sugar absorption.

Studies in mice also suggest that this kinase may also regulate neuronal functions and correlate

fear-induced conflict behavior after stress. Alternatively spliced transcript variants encoding distinct

isoforms have been reported. [provided by RefSeq, Jul 2008]

**Immunogen** A synthetic peptide of human PKC beta 1

Gene ID 5579

Swiss Prot P05771

Synonyms PKCB; PRKCB1; PRKCB2; PKC-beta

**Reactivity** Human, Mouse, Rat

**Application** WB, IHC-P, ICC/IF, FC

Recommended dilution WB: 1:1000

IHC-P: 1:100 ICC/IF: 1:100

FC: 1:100-1:200

Calculated MW 77 kDa

Observed MW 77 kDa

## For Research Use Only **Product Datasheet**

Host species Rabbit

**Clonality** Monoclonal

Clonality No. DGR11157

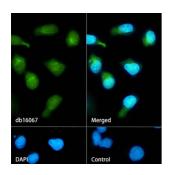

**Isotype** IgG

**Purity** Affinity Purification

**Conjugation** Un-conjugated

Storage Stability Store at -20°C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium

azide and 0.05% BSA. Stable for 12 months from date of receipt.

Immunofluorescence analysis of Hela cells labelling PKC beta 1 with db16067.

The cells were fixed with cold 100% methanol (10min, 4°C) and blocked in 1% BSA/10% normal goat serum/0.3M glycine in 0.1% PBS-Tween 20 for 1h. The cells were then incubate with db16067 (1:100) at room temperature for 1h, followed by a further incubation at room temperature for 45min with Goat Anti Rabbit IgG (H+L)-AF488 (db10005, shown in green). Nuclear DNA was labeled in blue with DAPI.

Control: Secondary antibody only.
