

## His Tag (DGR33137) Mouse mAb

db22026

Package : 10µL 20µL 50µL 100µL

**Product Name** : His Tag (DGR33137) Mouse mAb**Cat.No.:** db22026**Application** : WB, ICC/IF**Reactivity** : Transfected**Host species** : Mouse**Background**

Protein tags are protein or peptide sequences located either on the C- or N- terminal of the target protein, which facilitates one or several of the following characteristics: solubility, detection, purification, localization and expression. His tag is often used for affinity purification and binding assays. Expressed His tagged proteins can be purified and detected easily because the string of histidine residues binds to several types of immobilized metal ions, including nickel, cobalt and copper, under specific buffer conditions. The His tag antibody is a useful tool for monitoring of the His-tagged proteins, and recognizes His-tags placed at N-terminal, C-terminal, and internal regions of fusion proteins expressed in bacteria, insect, and mammalian cells.

**Immunogen**

A synthetic peptide of His tag

**Reactivity**

Transfected

**Application**

WB, ICC/IF

**Recommended dilution**WB: 1:1000  
ICC/IF: 1:100**Calculated MW**

1 kDa

**Observed MW**

According to the fused protein

**Host species**

Mouse

**Clonality**

Monoclonal

**Clonality No.**

DGR33137

**Isotype**

IgG1

**Purity**

Affinity Purification

**Conjugation**

Un-conjugated

**Storage Stability**

Store at -20°C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40%Glycerol, 0.01% sodium azide and 0.05% BSA. Stable for 12 months from date of receipt.
