Product Name : RIP (DGR18818) Rabbit mAb (PBS Only)**Cat.No.:** db13894-PBS**Synonyms** : RIP; RIP1; RIP-1**Application** : WB**Reactivity** : Human**Host species** : Rabbit**Background**

This gene encodes a member of the receptor-interacting protein (RIP) family of serine/threonine protein kinases. The encoded protein plays a role in inflammation and cell death in response to tissue damage, pathogen recognition, and as part of developmental regulation. RIPK1/RIPK3 kinase-mediated necrosis is referred to as necroptosis. Genetic disruption of this gene in mice results in death shortly after birth. [provided by RefSeq, Aug 2017]
