Product Name : Bcl2 (9A4) Mouse mAb (PBS Only)**Cat.No.:** db6598-PBS**Synonyms** : BCL2; Apoptosis regulator Bcl-2**Application** : WB**Reactivity** : Human, Rat, Mouse**Host species** : Mouse**Background**

Suppresses apoptosis in a variety of cell systems including factor-dependent lymphohematopoietic and neural cells. Regulates cell death by controlling the mitochondrial membrane permeability. Appears to function in a feedback loop system with caspases. Inhibits caspase activity either by preventing the release of cytochrome c from the mitochondria and/or by binding to the apoptosis-activating factor (APAF-1). May attenuate inflammation by impairing NLRP1-inflammasome activation, hence CASP1 activation and IL1B release (PubMed/17418785).
