Package : 20μL 50μL 100μL

Product Name : c-Rel Rabbit pAb**Cat.No.:** db22935**Synonyms** : C-Rel**Application** : WB, IP**Reactivity** : Human**Host species** : Rabbit**Background**

This gene encodes a protein that belongs to the Rel homology domain/immunoglobulin-like fold, plexin, transcription factor (RHD/IPT) family. Members of this family regulate genes involved in apoptosis, inflammation, the immune response, and oncogenic processes. This proto-oncogene plays a role in the survival and proliferation of B lymphocytes. Mutation or amplification of this gene is associated with B-cell lymphomas, including Hodgkin's lymphoma. Single nucleotide polymorphisms in this gene are associated with susceptibility to ulcerative colitis and rheumatoid arthritis. Alternative splicing results in multiple transcript variants encoding different isoforms. [provided by RefSeq, Apr 2014]

Immunogen

A synthetic peptide of human c-Rel

Gene ID

5966

Swiss Prot

Q04864

Synonyms

C-Rel

Reactivity
