Product Name : Munc 13-4 Rabbit pAb**Cat.No.:** db20002**Synonyms** : FHL3; HLH3; HPLH3; Munc13-4**Application** : WB, ICC/IF, FC**Reactivity** : Human, Mouse**Host species** : Rabbit**Background**

This gene encodes a protein that is a member of the UNC13 family, containing similar domain structure as other family members but lacking an N-terminal phorbol ester-binding C1 domain present in other Munc13 proteins. The protein appears to play a role in vesicle maturation during exocytosis and is involved in regulation of cytolytic granules secretion. Mutations in this gene are associated with familial hemophagocytic lymphohistiocytosis type 3, a genetically heterogeneous, rare autosomal recessive disorder. [provided by RefSeq, Jul 2008]
