Product Name : SOX11 Rabbit pAb**Cat.No.:** db7712**Synonyms** : CSS9; MRD27**Application** : WB, IHC**Reactivity** : Human**Host species** : Rabbit**Background**

This intronless gene encodes a member of the SOX (SRY-related HMG-box) family of transcription factors involved in the regulation of embryonic development and in the determination of the cell fate. The encoded protein may act as a transcriptional regulator after forming a protein complex with other proteins. The protein may function in the developing nervous system and play a role in tumorigenesis. [provided by RefSeq, Jul 2008]
