c-Kit Rabbit pAb

db9066 Package: 20μL 50μL 100μL

Product Name: c-Kit Rabbit pAb

Cat.No.: db9066

Synonyms: PBT; SCFR; C-Kit; CD117; MASTC

Application: WB, IHC

Reactivity: Human, Mouse, Rat

Host species: Rabbit

Background This gene encodes a receptor tyrosine kinase. This gene was initially identified as a homolog of

the feline sarcoma viral oncogene v-kit and is often referred to as proto-oncogene c-Kit. The canonical form of this glycosylated transmembrane protein has an N-terminal extracellular region with five immunoglobulin-like domains, a transmembrane region, and an intracellular tyrosine kinase domain at the C-terminus. Upon activation by its cytokine ligand, stem cell factor (SCF), this

protein phosphorylates multiple intracellular proteins that play a role in in the proliferation, differentiation, migration and apoptosis of many cell types and thereby plays an important role in

hematopoiesis, stem cell maintenance, gametogenesis, melanogenesis, and in mast cell development, migration and function. This protein can be a membrane-bound or soluble protein.

Mutations in this gene are associated with gastrointestinal stromal tumors, mast cell disease, acute myelogenous leukemia, and piebaldism. Multiple transcript variants encoding different isoforms

have been found for this gene. [provided by RefSeq, May 2020]

Immunogen Recombinant protein of human c-Kit

Gene ID 3815

Swiss Prot P10721

Synonyms PBT; SCFR; C-Kit; CD117; MASTC

Reactivity Human, Mouse, Rat

Application WB, IHC

Recommended dilution WB: 1:1000

IHC: 1:500

Calculated MW 110 kDa

Observed MW 120-145 kDa

Host species Rabbit

For Research Use Only **Product Datasheet**

Clonality Polyclonal

Isotype IgG

Purity Affinity Purification

Conjugation Un-conjugated

Storage Stability Store at -20°C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium

azide and 0.05% BSA. Stable for 12 months from date of receipt.
