Phospho-Vimentin (Ser82) Rabbit pAb

db22374 **Package : 20μL 50μL 100μL**

Product Name : Phospho-Vimentin (Ser82) Rabbit pAb
Cat.No.: db22374
Synonyms : VIM
Application : WB
Reactivity : Human, Mouse, Rat
Host species : Rabbit

Background	This gene encodes a type III intermediate filament protein. Intermediate filaments, along with microtubules and actin microfilaments, make up the cytoskeleton. The encoded protein is responsible for maintaining cell shape and integrity of the cytoplasm, and stabilizing cytoskeletal interactions. This protein is involved in neuritogenesis and cholesterol transport and functions as an organizer of a number of other critical proteins involved in cell attachment, migration, and signaling. Bacterial and viral pathogens have been shown to attach to this protein on the host cell surface. Mutations in this gene are associated with congenital cataracts in human patients. [provided by RefSeq, Aug 2017]
Immunogen	A synthetic phosphopeptide corresponding to residues surrounding Ser82 of human Vimentin
Gene ID	7431
Swiss Prot	P08670
Synonyms	VIM
Reactivity	Human, Mouse, Rat
Application	WB
Recommended dilution	WB: 1:10000
Calculated MW	54 kDa
Observed MW	54 kDa
Host species	Rabbit
Clonality	Polyclonal
Isotype	IgG
Purity	Affinity Purification
Conjugation	Un-conjugated

Storage Stability	Store at -20°C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium azide and 0.05% BSA. Stable for 12 months from date of receipt.
