**Product Name** : Apolipoprotein M Rabbit pAb**Cat.No.:** db2230**Synonyms** : G3a; NG20; apo-M; HSPC336**Application** : WB, IHC, FC**Reactivity** : Human**Host species** : Rabbit**Background**

The protein encoded by this gene is an apolipoprotein and member of the lipocalin protein family. It is found associated with high density lipoproteins and to a lesser extent with low density lipoproteins and triglyceride-rich lipoproteins. The encoded protein is secreted through the plasma membrane but remains membrane-bound, where it is involved in lipid transport. Alternate splicing results in both coding and non-coding variants of this gene. [provided by RefSeq, Jan 2012]
