

Nicastrin Rabbit pAb

db2273 Package: 20μL 50μL 100μL

Product Name: Nicastrin Rabbit pAb

Cat.No.: db2273

Synonyms: ATAG1874
Application: WB, ICC/IF
Reactivity: Human
Host species: Rabbit

Background This gene encodes a type I transmembrane glycoprotein that is an integral component of the

multimeric gamma-secretase complex. The encoded protein cleaves integral membrane proteins, including Notch receptors and beta-amyloid precursor protein, and may be a stabilizing cofactor required for gamma-secretase complex assembly. The cleavage of beta-amyloid precursor protein yields amyloid beta peptide, the main component of the neuritic plaque and the hallmark lesion in the brains of patients with Alzheimer's disease; however, the nature of the encoded protein's role in Alzheimer's disease is not known for certain. Mutations in this gene are associated with familial acne inversa. A pseudogene of this gene is present on chromosome 21. Alternatively spliced transcript variants of this gene have been described, but the full-length nature of some of these

variants has not been determined. [provided by RefSeq, Feb 2014]

Immunogen A synthetic peptide of human Nicastrin

Gene ID 23385

Swiss Prot Q92542

Synonyms ATAG1874

Reactivity Human

Application WB, ICC/IF

Recommended dilution WB: 1:1000-1:5000

ICC/IF: 1:20-1:50

Calculated MW 78 kDa

Observed MW 110-120 kDa

Host species Rabbit

Clonality Polyclonal

Isotype IgG

For Research Use Only **Product Datasheet**

Purity Affinity Purification

Conjugation Un-conjugated

Storage Stability Store at -20°C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium

azide and 0.05% BSA. Stable for 12 months from date of receipt.
