

RIP Rabbit pAb

db3290

Package : 20μL 50μL 100μL

Product Name : RIP Rabbit pAb**Cat.No.:** db3290**Synonyms** : RIP; RIP1; RIP-1**Application** : WB, FC**Reactivity** : Human**Host species** : Rabbit**Background**

This gene encodes a member of the receptor-interacting protein (RIP) family of serine/threonine protein kinases. The encoded protein plays a role in inflammation and cell death in response to tissue damage, pathogen recognition, and as part of developmental regulation. RIPK1/RIPK3 kinase-mediated necrosis is referred to as necroptosis. Genetic disruption of this gene in mice results in death shortly after birth. [provided by RefSeq, Aug 2017]

Immunogen

Recombinant protein of human RIP

Gene ID

8737

Swiss Prot

Q13546

Synonyms

RIP; RIP1; RIP-1

Reactivity

Human

Application

WB, FC

Recommended dilution

WB: 1:2000

FC: 1:20

Calculated MW

76 kDa

Observed MW

76 kDa

Host species

Rabbit

Clonality

Polyclonal

Isotype

IgG

Purity

Affinity Purification

Conjugation

Un-conjugated

Storage Stability

Store at -20°C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium

azide and 0.05% BSA. Stable for 12 months from date of receipt.
