Product Name : IGFBP4 Rabbit pAb**Cat.No.:** db3395**Synonyms** : BP-4; IBP4; IGFBP-4; HT29-IGFBP**Application** : WB, FC, IP**Reactivity** : Human**Host species** : Rabbit**Background**

This gene is a member of the insulin-like growth factor binding protein (IGFBP) family and encodes a protein with an IGFBP domain and a thyroglobulin type-I domain. The protein binds both insulin-like growth factors (IGFs) I and II and circulates in the plasma in both glycosylated and non-glycosylated forms. Binding of this protein prolongs the half-life of the IGFs and alters their interaction with cell surface receptors. [provided by RefSeq, Jul 2008]
