Product Name : Heme Oxygenase 1 Rabbit pAb**Cat.No.:** db3474**Synonyms** : HO-1; HSP32; HMOX1D; bK286B10**Application** : WB, IHC, FC, IP**Reactivity** : Human, Mouse**Host species** : Rabbit**Background**

Heme oxygenase, an essential enzyme in heme catabolism, cleaves heme to form biliverdin, which is subsequently converted to bilirubin by biliverdin reductase, and carbon monoxide, a putative neurotransmitter. Heme oxygenase activity is induced by its substrate heme and by various nonheme substances. Heme oxygenase occurs as 2 isozymes, an inducible heme oxygenase-1 and a constitutive heme oxygenase-2. HMOX1 and HMOX2 belong to the heme oxygenase family. [provided by RefSeq, Jul 2008]
