

GAPDH Rabbit pAb

db7662 Package : 20μL 100μL 500μL 1mL

Product Name: GAPDH Rabbit pAb

Cat.No.: db7662

Synonyms: G3PD; GAPD; HEL-S-162eP

Application: WB, IHC, ICC/IF, FC

Reactivity: Human, Mouse, Rat, Monkey, Chicken, Dog

Host species: Rabbit

BackgroundThis gene encodes a member of the glyceraldehyde-3-phosphate dehydrogenase protein family.

The encoded protein has been identified as a moonlighting protein based on its ability to perform mechanistically distinct functions. The product of this gene catalyzes an important energy-yielding step in carbohydrate metabolism, the reversible oxidative phosphorylation of glyceraldehyde-3-phosphate in the presence of inorganic phosphate and nicotinamide adenine dinucleotide (NAD). The encoded protein has additionally been identified to have uracil DNA glycosylase activity in the nucleus. Also, this protein contains a peptide that has antimicrobial activity against E. coli, P. aeruginosa, and C. albicans. Studies of a similar protein in mouse have assigned a variety of additional functions including nitrosylation of nuclear proteins, the regulation of mRNA stability, and acting as a transferrin receptor on the cell surface of macrophage. Many pseudogenes similar to this locus are present in the human genome. Alternative splicing results in multiple transcript

variants. [provided by RefSeq, Nov 2014]

Immunogen Recombinant protein of human GAPDH

Gene ID 2597

Swiss Prot P04406

Synonyms G3PD; GAPD; HEL-S-162eP

Reactivity Human, Mouse, Rat, Monkey, Chicken, Dog

Application WB, IHC, ICC/IF, FC

Recommended dilution WB: 1:2000

IHC: 1:100 ICC/IF: 1:50

FC: 1:50

Calculated MW 36 kDa

Observed MW 36 kDa

For Research Use Only **Product Datasheet**

Host species Rabbit

Clonality Polyclonal

Isotype IgG

Purity Affinity Purification

Conjugation Un-conjugated

Storage Stability Store at -20°C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium

azide and 0.05% BSA. Stable for 12 months from date of receipt.
