Package : 20µL 50µL 100µL

Product Name : Neogenin Rabbit pAb**Cat.No.:** db7793**Synonyms** : NGN; IGDCC2; NTN1R2**Application** : WB, IP**Reactivity** : Human**Host species** : Rabbit**Background**

This gene encodes a cell surface protein that is a member of the immunoglobulin superfamily. The encoded protein consists of four N-terminal immunoglobulin-like domains, six fibronectin type III domains, a transmembrane domain and a C-terminal internal domain that shares homology with the tumor suppressor candidate gene DCC. This protein may be involved in cell growth and differentiation and in cell-cell adhesion. Defects in this gene are associated with cell proliferation in certain cancers. Alternate splicing results in multiple transcript variants. [provided by RefSeq, Feb 2010]
