ATF2 Rabbit pAb

db7901 **Package : 20μL 50μL 100μL**

Product Name : ATF2 Rabbit pAb
Cat.No.: db7901
Synonyms : HB16; CREB2; TREB7; CREB-2; CRE-BP1
Application : WB, IHC, ICC/IF, IP
Reactivity : Human
Host species : Rabbit

Background	This gene encodes a transcription factor that is a member of the leucine zipper family of DNA binding proteins. The encoded protein has been identified as a moonlighting protein based on its ability to perform mechanistically distinct functions This protein binds to the cAMP-responsive element (CRE), an octameric palindrome. It forms a homodimer or a heterodimer with c-Jun and stimulates CRE-dependent transcription. This protein is also a histone acetyltransferase (HAT) that specifically acetylates histones H2B and H4 in vitro; thus it may represent a class of sequence-specific factors that activate transcription by direct effects on chromatin components. The encoded protein may also be involved in cell's DNA damage response independent of its role in transcriptional regulation. Several alternatively spliced transcript variants have been found for this gene [provided by RefSeq, Jan 2014]
Immunogen	A synthetic peptide of human ATF2
Gene ID	1386
Swiss Prot	P15336
Synonyms	HB16; CREB2; TREB7; CREB-2; CRE-BP1
Reactivity	Human
Application	WB, IHC, ICC/IF, IP
Recommended dilution	WB: 1:2000 IHC: 1:20 ICC/IF: 1:50 IP: 1:20
Calculated MW	55 kDa
Observed MW	70 kDa
Host species	Rabbit

Clonality	Polyclonal
Isotype	IgG
Purity	Affinity Purification
Conjugation	Un-conjugated
Storage Stability	Store at -20°C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium azide and 0.05% BSA. Stable for 12 months from date of receipt.
